THE GROVE OF TAU CETI

Demeter's not herself anymore.

Once the pride of humanity's interstellar fleet, the ESS *Demeter* is on a final voyage to Tau Ceti, where the promise of a new alliance awaits. When psychic interference from a nearby alien moon plunges *Demeter* into strange silence, an unsettling truth emerges: the ship's organic systems may no longer be under their control.

A telepathic technician haunted by her past must reawaken her abilities to help save *Demeter*. With the aid of a fellow Druid, a disgraced engineer, and a sentient forest, the crew fights for survival against an unknown intelligence bent on reshaping them.

With time running out, the remaining crew face an impossible choice: reclaim their home or risk losing the galaxy.
